Link to Seaport-e website, if available: http://www.ansolinc.com/contracts.htm

Brief Description of Capabilities - ANSOL, Inc. is a small San Diego, CA based corporation that offers a broad range of expertise in the area of submarine Command, Control, Communications, Computers and Intelligence (C4I) system acquisition, program management, financial management, product development, and integrated installation support. ANSOL has directly supported COMSPAWARSYSCOM and the Submarine Communications Program Office for over 20 years and is dedicated to supporting COMSPAWARSYSCOM, its resource sponsors and the Fleet with value-added innovative services and solutions in support of submarine C4I modernization. We strive to provide quality support to our customers by the way of:

- developing and maintaining useful tools and products that present data in a way that facilitates programmatic and budgeting decision making;
- initiating and participating in active working groups whose goals are to achieve integrated solutions for system-specific installations and for the installation process as a whole; and
- designing and implementing processes that increase efficiency and productivity while promoting cost savings.

ANSOL's intention/mission to provide the Navy with end-to-end capability is clearly reflected in the services and products it provides. ANSOL's experience and expertise in the areas of program and financial management makes us unique in the way of innovative thinking. All three areas of acquisition, product development, and integrated installations have been considered and incorporated into the way we do business. ANSOL has established strong relationships with the Resource Sponsors (OPNAV N61 and N77), CFFC, NAVNETWARCOM, TYCOMs, and within COMSPAWARSYSCOM. These relationships lend themselves to supporting ANSOL's ability to develop and successfully implement processes that will allow for future growth towards a more efficient and integrated United States Navy. ANSOL's processes for C4I modernization have been endorsed by Naval Network Warfare Command (NAVNETWARCOM) and held up as a model for other platforms to be modernized. ANSOL is at the leading edge of the wave of change of modernization in the U.S. Navy and stands poised for even greater opportunities in change management.
